

ROCKET MONITORING SERVICES

Rocket Monitoring Services (RMS) is your data collection and monitoring service for onsite septic systems.

RMS provides reports, alarm dispatch, troubleshooting and real-time support via remote telemetry.

Specializing in Orenco Systems® TCOM & VeriComm® Control Panels

- ➔ Panels only require a standard phone line (POTS) with minimal service!
- ➔ RMS monitors alarm conditions and reports findings whenever events occur!
- ➔ Ensure your system is completely operational and efficient 24/7!
- ➔ Annual contracts available!
- ➔ Contact us today for pricing and available options!

Services:

- ➔ RMS will monitor system operation for faults and alarms. When alarm conditions arise, RMS will contact customer (or customer's designee) with specific information. Pending site, RMS may adjust system settings to optimize performance or reduce alarm frequency.
- ➔ Data logs will be collected monthly. compiled into a standard or customized report & provided to the customer. Reports can include: flows compared to design, pump operation, faults, recirculation ratio, etc.
- ➔ Upon request, RMS is available for assistance with system operation testing (float function test, pump operation, etc.)

Requirements:

- ➔ TCOM Panels require a dedicated phone line with capability to dial a toll-free (1-800) phone number. Control panels using internet-based communication will require static IP and email capabilities.
- ➔ VeriComm® Panels require a non-dedicated phone line, and a subscription with manufacturer (when required).
- ➔ RMS will require system documentation for TCOM Panels (system layout, panel diagram, etc.)..
